

AquaFair 2004 & Canadian Aquaculture Tour

Join ACG to see one of North America's leading aquaculture industry events - [AquaFair 2004](#) - in St. Andrews, New Brunswick, Canada. At the same time take the opportunity to visit with aquaculture industry leaders and research institutions, tour their facilities throughout Atlantic Canada, and learn about Canada's cold-water aquaculture industry.

Let this be your opportunity for 8 days of seeing, learning and networking. Sign up to join us!

AquaFair 2004 is the "new" Atlantic Aquaculture, Exposition, Conference and Fair. The theme for AquaFair 2004 is "*A World of Opportunities in Aquaculture*". This year's AquaFair takes place June 9-13, and as always, it is the picturesque town of St. Andrews, New Brunswick, which is the host of the event.

ACG is planning a tour to AquaFair 2004 for interested international visitors to experience first hand "*The Miracle of Charlotte County*", in Southwest New Brunswick, a premier example of the positive social and economic impacts that aquaculture development brings to rural and coastal communities.

We believe this example is reproducible both in other parts of Canada and abroad and would like to assist the Canadian aquaculture industry to showcase their success to a world that is seeking to understand what aquaculture means and how it can be integrated into a community.

ACG will organize and lead daily excursions to visit aquaculture research, production, supply & service facilities in Charlotte County and beyond. Visits to both Nova Scotia and Prince Edward Island will be included in the tour itinerary prior to arriving in St. Andrews.

Proposed Tour Outline - June 5 - 13, 2004

Saturday, June 5	Arrive in Halifax, Nova Scotia; orientation, social events, networking
Sunday, June 6	Site tours/meeting - Nova Scotia
